➤ green PROFINET

Switch to these CO₂-reduced cables
and help us to make a difference
➤ ONE CONNECTION AT A TIME

CABLE CHARACTERISTICS

Green PUR version acc. to PROFINET type C

Type designation 2YH(ST)C11Y 2x2x0.75 /

1.5-100 LI VZN GN

Order No. L45467-J17-B518

- For trailing applications
- Withstands more than 3 mio. bending cycles
- Oil resistant acc. to DIN EN 60811-404 (7x24 hours / 90 °C)
- Flame retardant acc. to IEC 60332-1-2
- UV resistant acc. to UL 2556 Sec. 4.2.8.5 (720 h)
- Halogen free acc. acc. to IEC 60754-1
- Smoke-density acc. to IEC 61034

Green PVC version acc. to PROFINET type B

Type designation 2YY(ST)CY 2x2x0.75 / 1.5 LI VZN GN

Order No. L45467-J17-B395

- For flexible installation
- Oil resistant acc. to IEC 60811-2-1 (4 hours / 70 °C)

Innovative jacket material based on plant basis

BizLink has extended its range of FieldLink products with two new innovative Industrial Ethernet cables. Each designed to revolutionize your connectivity while minimizing environmental impact.

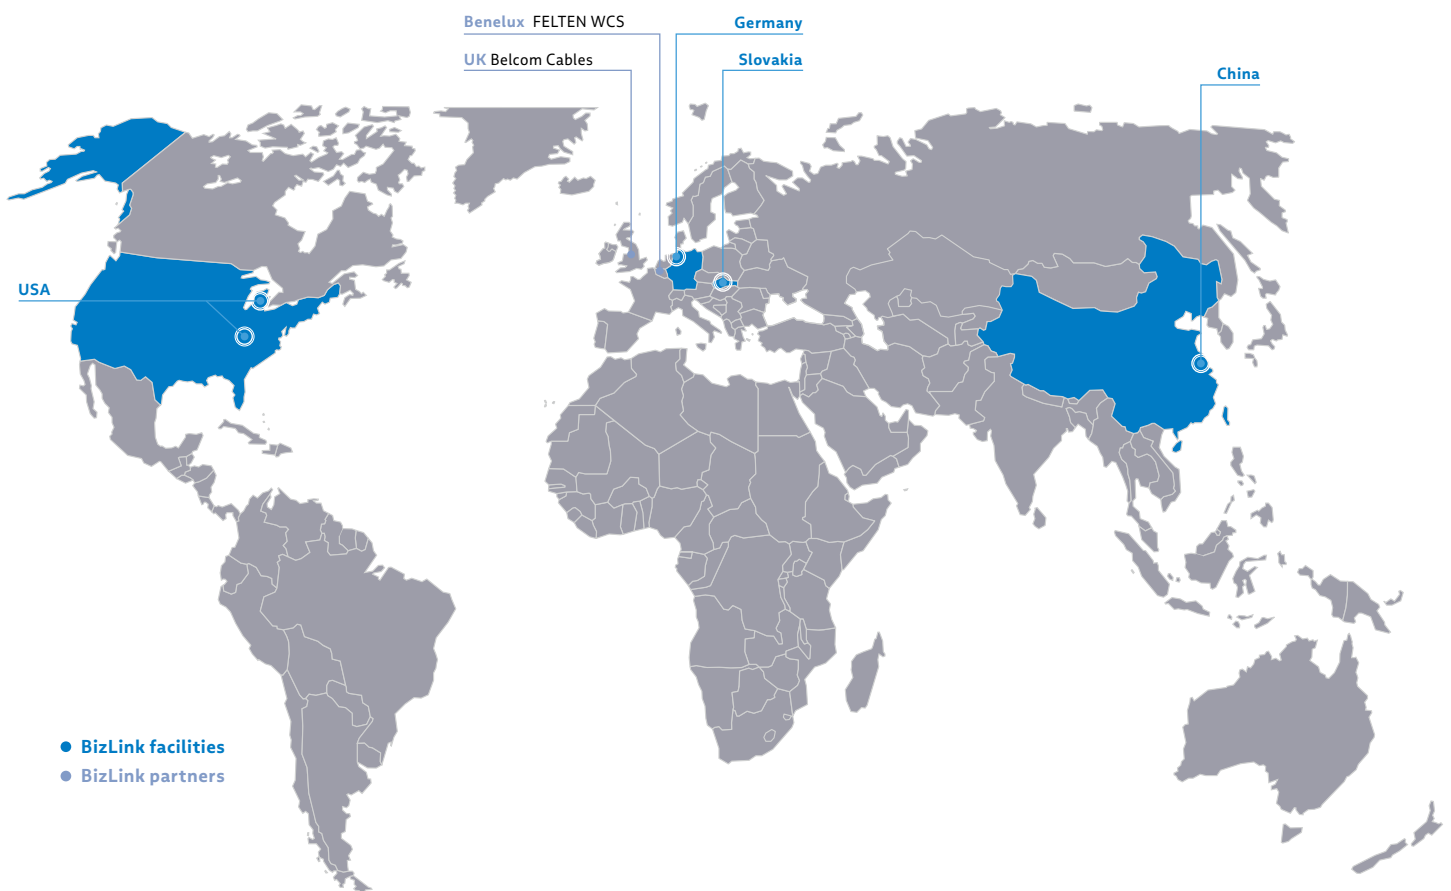

The cables are available in two versions: One cable produced with PVC jacket and one with PUR jacket, both engineered with raw materials derived from plants rather than fossil fuels. This innovative approach significantly reduces their CO₂ footprint, paving the way for a greener future.

BizLink understands the importance of sustainability without compromising performance. That's why these new PVC and PUR cables not only deliver exceptional quality and reliability but also contribute to a greener world. By adopting these new plant-based materials, BizLink drastically reduced the environmental impact without sacrificing the durability or efficiency you expect.

BizLink also sources the raw materials from short local supply chains, which means a further reduction in our carbon footprint.
